LinkedIn: <https://www.linkedin.com/in/nipuna-aluthdeniya> **GitHub:** <https://github.com/NipunaAluthdeniya>

Portfolio: <https://nipunaaluthdeniya.me>

Software Engineer with 2+ years of experience in **enterprise-grade** web and mobile application development. Strong background in **backend systems, RESTful APIs, third-party integrations, and ERP solutions** using **Java, Laravel, Vue.js and React.js**. Experienced in **Agile** environments, **CI/CD** pipelines, **Docker**-based deployments, and delivering **reliable, scalable** software for real-world operations.

TECHNICAL SKILLS

Programming Languages: Java, C#, JavaScript, TypeScript, Python, PL/SQL

Frontend Technologies: Angular, React.js, Next.js, Vue.js, TailwindCSS, Bootstrap

Backend Technologies: Node.js, Laravel, Spring Boot

Databases: Oracle, MSSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, GitHub Actions, CI/CD

Version Control & Tools: GitHub, Bitbucket, Jira, Figma

Methodologies: Agile (Scrum)

AI Development Tools: Claude, GitHub Copilot, OpenAI Codex

PROFESSIONAL EXPERIENCE

Software Engineer

Exam Genius FZCO

April 2026 – Present

Sri Lanka

- Built a scalable LMS student portal using **Vue 3, Laravel (REST API), and MySQL**, leveraging the **Odix** LMS Academy template and Bootstrap 5 for a responsive, production-ready UI.
- Built a centralized **Axios HTTP client** with **Sanctum** token injection, global 401 silent re-auth, 429 exponential backoff, and upload progress tracking — replacing all ad-hoc API calls.
- Implemented a **reusable state-handling framework** covering 5 empty-state variants, content-shaped skeleton loaders, and dual-layer error boundaries with full HTTP error code coverage.
- Integrated **Auth0 + Laravel Sanctum** with CSRF handshake, XSS-safe **Vuex** token storage, **route guards**, and a Page Visibility-aware keepalive to preserve long sessions.
- Developed a **responsive App Shell** with collapsible sidebar, route-aware highlighting, offline detection, and URL-query-param filtering across the Class → Subject → Module hierarchy.
- Engineered a **self-hosted video learning experience** with **Video.js, S3 signed URLs**, resume-from-last-position, 90%-completion tracking, cross-device bookmarks, and in-lesson notes.
- Accelerated delivery by leveraging **AI-assisted tools (Claude, Codex, GitHub Copilot)** for scaffolding, Vuex patterns, and code review while adhering to strict architectural standards.

Software Engineer

IFS R&D International (Pvt) Ltd.

Jul 2024 – Jan 2026

Sri Lanka

- Developed and enhanced Line Maintenance and Hangar Maintenance modules within the Maintenance Execution domain using **Java EE** and **PL/SQL**, supporting real-world airline operations.
- Contributed to the development of an IPC Viewer plugin using **React.js** with a **micro-frontend architecture**, implementing **event-driven interactions** and backend business logic via **Java-based APIs** and **PL/SQL**.

- Designed and implemented **RESTful integrations** between IFS Supply Chain and third-party systems, enabling efficient stock control and aviation materials management.
- Built core **Labor Hours** and **Skill Validation** functionalities, including actual time tracking, controlled work assignments, bulk sign-off workflows, and technician skill enforcement across web and mobile platforms — supporting **full feature delivery** through completion of multiple interdependent user stories.
- Implemented integration between Work Orders and Work Tasks using aviation task **models** and **object-oriented inheritance** while maintaining backward compatibility and system stability.
- Collaborated with business stakeholders, QA teams, and architects to **gather requirements, design solutions**, and **deliver features on schedule**.
- Provided production support by diagnosing and resolving **high-priority issues, minimizing system downtime** — stabilizing completed features by resolving **29 production defects** across multiple releases, including high-impact execution and integration issues.
- Mentored **junior developers** and **interns** through **code reviews, technical guidance, and clean coding best practices**.

Trainee Software Engineer

Pristine Solutions (Pvt) Ltd.

Jan 2023 – Jul 2023

Sri Lanka

- Contributed to full-stack development of enterprise web applications using **Angular**, and **Node.js**.
- Worked closely with **clients to gather requirements, analyze feature requests, and implement enhancements**.
- Developed SAP-integrated solutions using **SAP HANA, XS JavaScript (XSJS)**, and **REST-based** services.

EDUCATION

Bachelor of Science (Hons) in Information Technology

University of Moratuwa, Sri Lanka

Dec 2024

GPA: 3.43

PROJECTS

Academic Journal Library (Research) | *Python, Natural Language Processing*

Aug 2023 – Aug 2024

- Designed and developed an **NLP-powered** academic journal library with **LLM-based Retrieval Augmented Generation (RAG)** to summarize full-text research articles, extract section-wise insights, categorize literature by subject hierarchy, and improve question-answering accuracy while reducing hallucinations.

Publications :

- Centralized and Labeled Academic Journal Library Using Machine Learning & Deep Learning Approaches, [**Best Student Paper Award**] 10.1109/ICIPRoB62548.2024.10544300 [🔗](#)

Salon Management System | *React, TailwindCSS, Node.js, Express.js, MongoDB*

Jun 2022 – Jun 2023

- Developed a **full-stack web application** for employee management, service handling, stock management, and job scheduling.
- Focused on **backend** job management workflows and **REST API** development.
