🏠 nipunaaluthdeniya.me

Software Engineer with 2+ years of experience in **enterprise-grade** web and mobile application development. Strong background in **backend systems, RESTful APIs, third-party integrations, and ERP solutions** using **Java, C#, .NET, Spring Boot, Angular, and React.js**. Experienced in **Agile** environments, **CI/CD** pipelines, **Docker**-based deployments, and delivering **reliable, scalable** software for real-world operations.

TECHNICAL SKILLS

Programming Languages: Java, C#, JavaScript, TypeScript, Python, PL/SQL
Frontend Technologies: Angular, React.js, Next.js, HTML, CSS, TailwindCSS, Bootstrap
Backend Technologies: Node.js, Express.js, Spring Boot, ASP.NET Core, .NET
Databases: Oracle, MSSQL, MySQL, MongoDB
Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
Version Control & Tools: GitHub, Bitbucket, Jira, Figma
Methodologies: Agile (Scrum), Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Software Engineer
IFS R&D International (Pvt) Ltd.

Jul 2024 – Jan 2026
Sri Lanka

- Developed and enhanced Line Maintenance and Hangar Maintenance modules within the Maintenance Execution domain using **Java EE** and **PL/SQL**, supporting real-world airline operations.
- Contributed to the development of an IPC Viewer plugin using **React.js** with a **micro-frontend architecture**, implementing **event-driven interactions** and backend business logic via **Java-based APIs** and **PL/SQL**.
- Designed and implemented **RESTful integrations** between IFS Supply Chain and third-party systems, enabling efficient stock control and aviation materials management.
- Built core **Labor Hours** and **Skill Validation** functionalities, including actual time tracking, controlled work assignments, bulk sign-off workflows, and technician skill enforcement across web and mobile platforms — supporting **full feature delivery** through completion of multiple interdependent user stories.
- Implemented integration between Work Orders and Work Tasks using aviation task **models** and **object-oriented inheritance** while maintaining backward compatibility and system stability.
- Developed **synchronous** and **asynchronous communication mechanisms** to support scalable and fault-tolerant third-party integrations.
- Implemented and maintained **CI/CD pipelines** using **Bitbucket, Docker, and AWS** to streamline deployments and reduce release risks.
- Collaborated with business stakeholders, QA teams, and architects to **gather requirements, design solutions, and deliver features on schedule**.
- Provided production support by diagnosing and resolving **high-priority issues, minimizing system downtime** — stabilizing completed features by resolving **29 production defects** across multiple releases, including high-impact execution and integration issues.
- Mentored **junior developers** and **interns** through **code reviews, technical guidance, and clean coding best practices**.

- Contributed to full-stack development of enterprise web applications using **Angular, React.js, Node.js, C#,** and **.NET**.
- Worked closely with **clients to gather requirements, analyze feature requests, and implement enhancements.**
- Contributed to projects including **Harcourts Web, Domex,** and **TPL Web,** delivering bug fixes and production improvements.
- Developed SAP-integrated solutions using **SAP HANA, XS JavaScript (XSJS),** and **REST-based** services.

EDUCATION

Bachelor of Science (Hons) in Information Technology
University of Moratuwa, Sri Lanka

Dec 2024
GPA: 3.43

PROJECTS

Academic Journal Library (Research) | Python, Natural Language Processing *Aug 2023 – Aug 2024*

- Designed and developed an **NLP-powered** academic journal library with **LLM-based Retrieval Augmented Generation (RAG)** to summarize full-text research articles, extract section-wise insights, categorize literature by subject hierarchy, and improve question-answering accuracy while reducing hallucinations.

Publications :

- Centralized and Labeled Academic Journal Library Using Machine Learning & Deep Learning Approaches, [**Best Student Paper Award**] 10.1109/ICIPRoB62548.2024.10544300 

TPL WEB Project | React, SAP HANA XS Javascript (XSJS), SAP HANA *Jan 2023 – Jul 2023*

- Developed a **SAP Business One**–integrated web application to support **enterprise-level** business operations.
- Fixed production issues and implemented **client-requested feature enhancements through direct customer collaboration.**

Salon Management System | React, TailwindCSS, Node.js, Express.js, MongoDB *Jun 2022 – Jun 2023*

- Developed a **full-stack web application** for employee management, service handling, stock management, and job scheduling.
- Focused on **backend** job management workflows and **REST API** development.

Performance Appraisal System | Angular, Bootstrap, ASP.NET core, C#, MSSQL *Sep 2021 – Jul 2022*

- Built a **web-based** employee performance appraisal system to replace manual evaluation processes.
- Implemented authentication and authorization features including **role-based** access control, **email verification, password recovery,** and **secure login** workflows.
